Dear Congressman Crockett,

Just a brief note to express our strong support for your action in sponsoring a resolution calling on President Reagan to urge the South African government to release Nelson Mandela and recognize the ANC.

We believe that urging our own government to give recognition to the ANC is in itself a critical step. We also believe that legislation this spring must incorporate both strong sanctions against apartheid and a clear message of support for the liberation movements, SWAPO and the ANC, as well as support for the Front Line States, now suffering for giving such support.

With best wishes,

Jennifer Davis
Executive Director
